Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 5-6, 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Senda et al. [WO9119303A1].

Senda discloses high frequency inductor having plurality of spiral shaped inductor elements 3, 4, 12 mounted parallel on plurality of IC wiring layers arranged such the magnetic field/current directions generated by/through the inductor elements are substantially the same; connecting member 9 connecting the elements [figure 1].

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 7, 10 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Senda in view of Blumkin et al. [4626816].

Senda discloses the invention as claimed as cited above except for the inductor elements being connected in series. Blumkin discloses the flat spiral coils 28 are connected in series as shown in figure 1; the interlayer connections 75, 80, 90. At the time of the invention, it would

have been obvious to a person of ordinary skill in the art to have the coils connected in series as taught by Blumkin to Senda. The motivation would have been to provide a various configuration of connection as desired by application. Therefore, it would have been obvious to combine Blumkin with Senda.

Conclusion

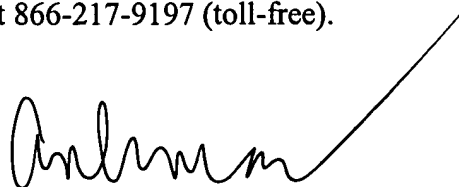

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Person et al. [6366192], Breen [5398400], Inoue [5382829].
